PROFESSIONAL SUMMARY

Frontend developer and college student at Vivekananda High School and College, Tangail, building responsive web applications with HTML, CSS, JavaScript, TypeScript, React, and Next.js. Currently expanding backend knowledge and working with MongoDB and authentication concepts. Seeking a Frontend Developer Internship or entry-level opportunity to contribute to real projects, learn from a team, and continue improving code quality and problem-solving.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, JavaScript (ES6+), TypeScript, React, Next.js, Tailwind CSS, GSAP

Backend & Data: MongoDB (learning), REST API integration, Better Auth (project experience)

Tools: Git, GitHub, VS Code, npm

Languages: Bangla (Native), English (Basic; improving)

PROJECTS

Bazar Dor — Bangla Market Price Website

Next.js, React, Tailwind CSS, REST API, Better Auth

- Developed a Bengali-language interface for browsing market-price information and product categories.
- Implemented category-based product browsing and sorting for easier product discovery.
- Built responsive UI components and connected the interface to API-driven product data.
- Worked on authentication flows as part of the application.
